

THE SURE-LOK CRATE SYSTEM CAN BE CUSTOMIZED TO SUIT YOUR SPECIFIC APPLICATION.

Our experienced Design and Engineering staff will work with you to develop a cost-effective container system. SURE-LOK Crates can be customized with a wide variety of innovative features to fit your specific need.

- Trade Show Containers
- Demo Equipment
- KD Vehicle Programs
- Service Parts
- Rental Programs
- Closed Loop Parts Supply
- Medical Equipment
- Industrial Tooling
- Robotics and Aerospace
- Prototyping
- and More!

THE SURE-LOK CRATE SYSTEM

The SURE-LOK crate system is an amazingly simple, yet innovative crate design. Individual panels are precisely machined on state of the art CNC equipment, creating slots and interlocking edges that enable the base, sides and top to fit together for exceptional strength. It takes less than two minutes to assemble or disassemble most SURE-LOK crates.

SURE-LOK clips are manufactured from heat-treated spring steel and are finished with a corrosion resistant coating. These high-quality clips can be re-used indefinitely.

SAFE, FAST; EASY TO ASSEMBLE AND DISASSEMBLE

SURE-LOK clips are installed by simply snap-locking the clips into routed slots machined along the edges of each panel. For disassembly, SURE-LOK clips are easily removed by using our custom removal tool, another SURE-LOK clip as a pry tool, or the claw of a hammer.

4 STYLES OF CRATES

SURE-LOK Premium

Manufactured from high quality .75" exterior grade plywood panels. Compression tested to over 50,000 lbs.! Extremely durable and easy to assemble or disassemble. Ideally suited for programs where long-term reuse is desired.

SURE-LOK Standard

Virtually identical to our premium product but manufactured from lower cost .75 OSB (Oriented Strand Board) sheeting. Ideally suited for your heavier contents where limited reuse or one-way shipping is required.

SURE-LOK Lite

A cleated style that is well suited for large, lightweight applications. Alternative panel materials such as thin plywood or corrugated cardboard are used to reduce weight, resulting in panels that are easier to handle and crates that lower shipping costs. Compression tested up to 45,000 lbs.

SURE-LOK Economy

A lower cost option for your 1-way shipping needs with all the benefits of ease of assembly and disassembly. Manufactured from 7/16" OSB, these crates have been compression tested to 21,000 lbs.

EXTREMELY STRONG, DURABLE, RE-USABLE and CUSTOMIZABLE

- Extremely strong; compression tested for incredible stacking strength.
- Less costly and more durable than molded plastic bins.
- Limitless sizes and quantities with no tooling costs.
- Available with shock and vibration protection, corrosion inhibitors, castors, interior partitions, straps, ramps, or internal blocking and bracing. Custom logos and other markings can be stenciled or silk screened to suit a specific need.
- Made from 100% engineered wood products or plastic, so containers are fully ISPM-15 Export Compliant.

SURE-LOK crates collapse down, generally a 5:1 ratio, saving valuable warehouse or storage space and reducing trucking expense.
